01 About Celestial-X

Celestial-X is a PFP collection of 1559 Males and 1559 female programmatically generated Space explorers.

These Celestials (Space explorers) are crafted carefully keeping different dimensions in mind

- High Quality art
- Limited Supply
- Male & Female PFPs: Made for all
- Out of the box utilities: Unique Game
- Airdrops and Benefits: exclusive for HODLers

Each of these Celestials can be used as a game character in Battle Royale!
Battle Royale is a smart contract based game where 25 Celestials fight against each other and the last one standing wins.

02 Attributes & Traits of the Celestials

Each Celestial-X NFT is a unique combination of 9 Style traits and 4 Combat traits. Style traits are visible traits while Combat traits are something that adds to the Attributes/ Power of a Celestial. Combat traits are randomly assigned and they range between 1- 10.
10 being the highest and 1 being the lowest.
Each of the Combat trait can be further upgraded at the shop in order to improve the Attributes/ Power of a Celestial.

Style Traits
Background
Body
Face
Expression
Eye
Eyewear
Hair
Headgear
Outfit

Combat Traits
Attack
Defence
Magic Power
Luck

03 Elixir Land & $Elixir distribution

The land of Tezonia is fertile enough to generate Elixir!! Elixir is the singular most important resource of the entire game. All of the in-game upgrades can only be done through $Elixir. Elixir is very rare and we suggest to keep it safe with you ☺

Elixir Land is the ultimate piece of land on Tezonia that generates $Elixir over time.

Each Elixir Land generates $Elixir= (0.001 Elixir/second)*(Elixir Land Level)
Elixir accumulated over time can be claimed by connecting wallet to the website.

The basic Elixir Land level is set at 1 and can be upgraded up to level 10. Further details are covered in Upgrades & Game mechanics.

- Elixir can only be acquired through mining it from Elixir land or from the secondary market.
- Elixir Land can be acquired only by two ways: either through our marketplace or by minting Celestials. Elixir Land will be distributed based on the number of Celestial Couples minted (A male and a female Celestial forms a couple)

03 Elixir Land & $Elixir distribution

Our initial supporters mean a lot to us and we will not only be airdropping Elixir Land but $Elixir too. This will be based on the number of couples minted. Airdrop will be done in the following fashion:

Number of Mints	Bonus Airdrop
1 Celestial	100 $Elixir
1-3 couples	1000 $Elixir
4-8 couples	1000 $Elixir + 1 Elixir Land
9+ couples	1000 $Elixir + 3 Elixir Land

- The airdrop will be done on a later day after the launch of the PFP collection.

04 What is Battle Royale?

Battle Royal is the ultimate fight for the Number 1 spot in Tezonia.
It is a smart contract based game where 25 Celestials fight at once and based on the attributes of the Celestial, the best one wins.

The winner of the battle is decided based on a certain calculations which takes into account the Soft traits of a Celestial including: Attack, defense, magical attribute and Luck factor.
The rarity of a Celestial also plays into account. This is finally multiplied with a random factor which gives a small chance to even the weakest of Celestial to stand a chance to win the battle!!
How exciting: “An underdog wins the battle! Rare but not impossible ☺”

In order to generate this randomness into our Smart Contract, we are using an Oracle that provides this random factor.

05 Upgrades & Game mechanics

The main upgradable resources in the game are Elixir Land and Luck. Both of these can be upgraded using $Elixir.

- Luck upgrade: (1000+200X)*$Elixir (X is current level of Luck)
- Elixir Land Level upgrade: (1500+200Y)*$Elixir (Y is current level of Elixir Land)

Attack, Defense and Magic Power can be upgraded by equipping certain items available in the marketplace.

- Attack: Can be upgraded by equipping Weapons/ accessories etc.
- Defense: Can be upgraded by equipping Armors, helmets etc.
- Magic Power: Can be upgraded by equipping Magical potions/ spells etc.

Thankyou
